

HealthCraft Stainless Steel Easy Mount™ Grab Bars

Rust proof, featuring HealthCraft's innovative Easy Mount™ 9-hole flange design for greater mounting flexibility. ADA Compliant. Available in a knurled anti-slip or white powder coat finish.

Features and Benefits

▪ EASY MOUNT™ Flange.

Unlike 3-hole flanges that limit screw placement, HealthCraft's innovative 9-hole flange allows a grab bar to be installed at varying degrees. Easy Mount™ provides the option to insert additional screws if required.

▪ Will Never Rust.

Chrome plated grab bars can chip, rust and stain tile over time. HealthCraft grab bars are made of stainless steel and will never rust, ensuring a lifetime of worry free service.

▪ Concealed Screws.

Flange covers conceal the screws for an attractive finish.

▪ Can't Find A Stud?

See HealthCraft's website for specialized grab bar fasteners that can mount directly behind drywall and other surfaces to support up to 500 lbs / 227 kg.
